## **DETAILED ACTION**

### ***Claim Objections***

Claim 1 is objected to because of the following informalities: line 5 "pre-would", for examination purposes the Examiner has assumed that this is a typographical error and has used "pre-wound" in the examination process. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

Claims 1-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The term knocking has been used in the claims. It is known specifically what is meant by this term; for example, does the applicant mean "applying pressure", "welding", "melting" or perhaps "engine knocking". Correction and clarification is required.

### ***Allowable Subject Matter***

The following is a statement of reasons for the indication of allowable subject matter: the prior art does not teach a method for making a catalytic converter in which the catalytic core is surrounded by a intumescent mat and a pre-wound metal jacket; the mat being set by compression.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See US PTO-982.
